

Host entrepreneur: Richard Hipkiss

New entrepreneur: 2 from Romania and Turkey

Richard is a very good host, committed to learning and teaching. That is part of his business which trains people in employability skills for disadvantage groups. He is also a lovely person to deal with and the new entrepreneurs who joined him had an amazing experience.

For him, he also benefited from hosting them and in his own words:

“I have had two very successful Entrepreneurs work with me on two separate occasions. Both have improved my business, one in the development of a training programme and the other in the day to day operation of my organisation, with research and implementation of new ways of working.

We worked very well together on both placements, but we have not had the opportunity to work together since, but we keep in-touch.

The whole experience of the Erasmus for young entrepreneurs programme for me and my organisation has been very constructive and positive. I wish that I had the ability to have taken more people.”
